SUMMARY

Fullstack developer and game developer skilled in Unity (C#), Go, and React, with experience building game mechanics, NPC AI, RESTful APIs, and scalable cloud infrastructure on GCP. Proficient in integrating LLM coding agents and delivering responsive enterprise applications across multiple platforms.

WORK EXPERIENCE

OneMageArmy 2026–Present

Fullstack Developer | Game Developer

- Developed grid based RPG mechanics and systems in Unity (C#) for iOS & Android, and contributed to adapting gameplay controls and UI for an upcoming PC port.
- Developed REST APIs in Go for a psychometric assessment application and built custom C/C# internal tools, integrating LLM coding agents (Antigravity / Codex) to our workflows

Encora Mx 2025–2026

Fullstack Developer

- Developed responsive, enterprise web applications using React, TypeScript, and Java Spring Boot.
- Containerized backend services with Docker and deployed scalable cloud infrastructure on Google Cloud Platform (GCP).

Inotek GDL Jun 2024–Aug 2024

Fullstack Developer Internship

- Developed hotel management SaaS platform using PHP, JavaScript, and MySQL/MariaDB, implementing an automated booking engine and real-time occupancy reporting.

EDUCATION

Amerike Zapopan 2026

Bachelor of Software Engineering & Game Developing

Ceti Colomos 2021

Bachelor of Mechatronics Engineering

CORE SKILLS

- TypeScript
- PHP
- Unity
- JavaScript
- Java
- Docker
- Python
- SQL
- Git
- Go
- React
- MySQL
- C#
- Spring Boot
- Backend API Development
- Version Control with Git
- LLM Coding Agents
- RESTful API Design

CERTIFICATIONS

GCP - Associate Engineer, Google Cloud (2026)
